Danish Seed Company
SEED ANNUAL
for 1940

To Our Friends and Customers:

As this is the 26th yearly Seed Catalogue we are sending out, we take this opportunity to express our sincere appreciation and thanks for your liberal patronage and friendly cooperation. We trust that our service has been satisfactory and that you will again send us your orders for seeds and any other products we handle.

We aim to have the best obtainable stocks from this country, with a few high grade specialties from abroad. Seeds are mostly sold on confidence and our steady growth over a period of 25 years indicates that through our choice of good stocks we have fulfilled the trust our customers have placed in us.

Any order or inquiry you send us will receive prompt, careful, and courteous attention.

Respectfully,

DANISH SEED COMPANY,

Chris Mosberg.

All prices subject to changes and to being unsold.

On larger orders kindly ask for special quotations.

Delivery charges will be paid by us for all seeds except Peas, Beans, Corn, Bird Seed and Lawn Seed.

We give no warranty, express or implied, as to description, quality, productiveness, or any other matter connected with the goods we send out, and we will not be in any way responsible for the crop. If the purchaser does not accept the goods on these terms, they are at once to be returned. Examine seeds closely, test if desired, and if anything is wrong, the seed will be replaced or money refunded.

DANISH SEED COMPANY,

Chris Mosberg.

VEGETABLE SEEDS

ASPARAGUS

		Oz.	¼ Lb.	Lb
10 Washington	Pkt. 5c	\$0.10	\$0.30	\$1.00
Very large stems, rustproof, grows very rapidly and can be used partly 2 to 3 years after seeding.				
14 Washington Plants	We recommend to plant 1-year-old plants of this variety, and offer strong plants for \$10.00 per 1,000—\$1.50 per 100—and 40c for 25 plants.			
<i>Sow the seeds thinly, in rows, in the early spring, and dig up and plant in permanent bed the following early spring. Set the plants not closer than 15 in. apart in trenches with the tip of the plant 6 to 8 in. below the surface of the ground, spreading the roots out evenly in all directions.</i>				

BEANS—YELLOW PODDED BUSH

Sow the beans in rows leaving at least a 15 in. space between the rows, and either drop the seeds separately 2 or 3 in. apart, or drop 3 or 4 seeds in hills about 18 in. apart.

	Pkt.	Oz.	¼ Lb.	Lb.
95 Italian Green Sprouting10	.30	1.00	
<i>Early maturing, very tender.</i>				

CABBAGE

Nearly all our Cabbage Seeds are grown in Denmark and will give good satisfaction in almost any climate. For the earliest crop, sow the seed very early and have good plants hardened and ready to set out in the field in April. For late Cabbage in this vicinity, the seed should be sown in first half of May and the plants set out the last half of June in rows 2 to 3 feet apart and the plants about 2 feet apart.

	Pkt.	Oz.	¼ Lb.	Lb.
105 Early Jersey Wakefield05	.20	.60	2.00
<i>Very early, pointed heads.</i>				
108 Golden Acre05	.25	.75	2.50

111 Golden Acre, Yellow Resistant10	.35	1.25	4.00
112 Copenhagen Market05	.25	.75	2.50
<i>Very early, large, round, solid heads. If planted late, it makes an excellent Kraut cabbage.</i>				
113 Marion Market10	.35	1.00	3.00
<i>Yellow resistant, Copenhagen Market type.</i>				
116 Glory of Enkhuizen05	.20	.60	2.00
<i>Best variety for Mid-season. Can be planted closer together as it has few and smaller outer leaves. Will keep fairly well during December.</i>				
117 Globe10	.25	.80	3.00
<i>Yellow resistant, Glory of Enkhuizen type.</i>				
118 Flat Dutch or Brunswick Improved05	.20	.60	2.00
<i>Large, flat heads, not very hard and not a good keeper.</i>				
121 Danish Ballhead Amager, Medium Stem05	.20	.60	2.00
<i>Round-headed, half short stem, very good keeper. Heads uniform, very hard and heavy, not very large.</i>				
122 Danish Ballhead Munke Strain05	.20	.60	2.00
<i>Similar to the Amager strain except this is earlier, slightly larger.</i>				
123 Danish Ballhead Hunderup Tall-stem05	.20	.60	2.00
<i>Latest and best keeping cabbage, heads round or balloon shaped. For best result, this variety should be planted two weeks earlier than the short-stemmed variety.</i>				
126 Wisconsin Hollander05	.25	.80	3.00
<i>Yellow-resisting strain, has large leaves but will do on yellow infested soil.</i>				
131 Hollander10	.25	.80	3.00
<i>Ferry's strain. Preferred by some growers instead of the Danish strain.</i>				
133 Penn State Ballhead10	.35	1.00	3.50

142 Mammoth Large Red05	.25	.80
<i>Large, medium early.</i>				
143 Danish Stonehead05	.25	.80
<i>Best variety for late use, keeps well.</i>				

SAVOY CABBAGE

	Pkt.	Oz.	¼ Lb.	Lb.
150 Long Island05	.25

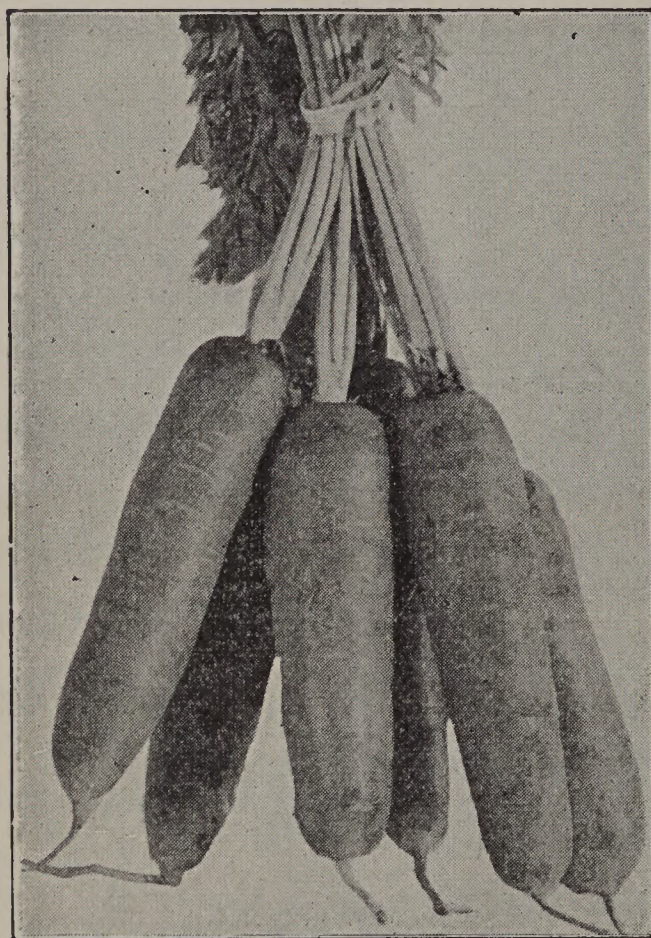

Rather loose heads, leaves curled or crimped, most tender and sweet cabbage. Does not keep well.

CHINESE CABBAGE

Also called Celery Cabbage, as it has no resemblance to cabbage except in the flavor. It grows upright with long or oblong loose heads, like Cos Lettuce. The seeds should be sown in late spring or early summer and the plants thinned out to at least a foot apart. Heads appear latter part of the summer.

155 Chihli05	.20	.60
-------------------------	------------	------------	------------	-------

Very early and gives the highest percentage of fairly solid and long heads.

CARROT NANTES IMPROVED

CARROT CHANTENAY

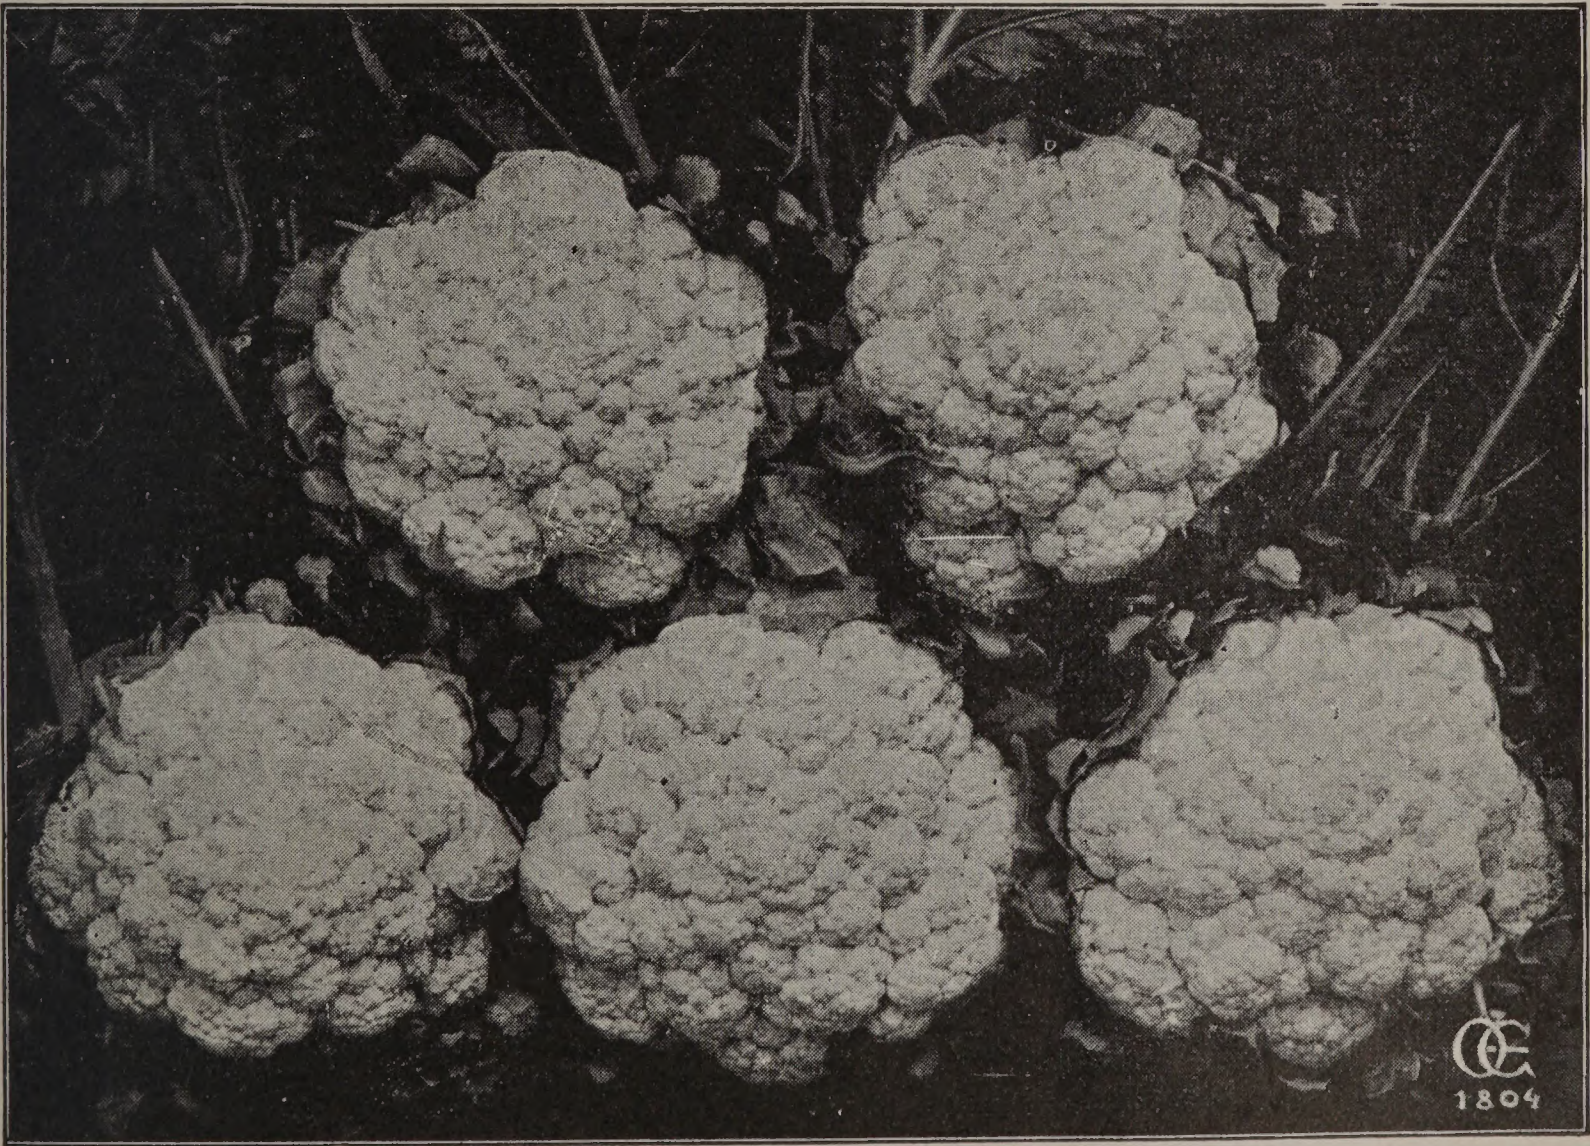

CARROTS

Sow in rows at least 10 inches apart and thin out when large enough. Varieties with large tops should be thinned out to about 3 inches apart and the small-topped varieties to 1½ to 2 inches. Carrots should not have fresh fertilizer. Does best in light soil which has been richly fertilized for a crop the preceding year.

	Pkt.	Oz.	¼ Lb.	Lb.
162 Delicacy05	.25	.80
Early, very tender and sweet. Attains the size of a little finger when ready to use. Short topped.				
163 Amsterdam05	.15	.40	1.25
Short topped, very early, cylindrical, turns orange-red when about ½ inch thick. A high quality carrot, but not very large.				
166 Oxheart05	.10	.25	.90
Early, short and thick. Should be used before they get too large. Good quality.				

CARROTS—Continued

	Pkt.	Oz.	¼ Lb.	Lb.
169 Nantes Improved05	.10	.30	1.00
Coreless cylindrical shaped, deep orange-red, very sweet and tender, early, short tops. One of the best carrots for home use.				
172 Chantenay05	.10	.25	.80
Most popular Market Carrot. Early, half long, blunt rooted, deep orange flesh, tops large.				
173 Red Cored Chantenay05	.10	.30	1.00
Red core, shorter top and sweeter than the ordinary Chantenay.				
175 Danvers Half Long.....	.05	.10	.25	.80
Medium early, half long, good quality.				
176 Imperator05	.10	.30	.90
New medium long carrot, top not very large but strong enough for bunching, roots deep orange red, indistinct core.				
179 Pride of Denmark.....	.05	.10	.30	1.00
Large Nantes type, deep orange-red, very sweet and a good keeper.				
183 Yellow Champion Giant10	.25	.80
Very large yellow Fodder carrot. Does well in poor sandy soil.				
184 White Belgian Giant10	.25	.80
Very large, White Fodder Carrot. Requires better soil than the yellow variety.				

CAULIFLOWER EARLY DANISH SNOWBALL

CAULIFLOWER SNOWDRIFT

CAULIFLOWER

For early Cauliflower, the seed should be started very early in the spring, so the plants can be strong and hardened and ready to set out in April. For late use the seed can be planted in the middle of May and the plants set out the latter half of June. We recommend to treat the bed with Semesan or Formaldehyde Dust before seeding, as the small plants are apt to damp off.

	Pkt.	Oz.	¼ Lb.	Lb.
190 Early Danish SnowballSmall Pkt. .10	.25	1.25	4.50	16.00
<i>Our most popular variety. It is very early but equally good for late planting.</i>				
191 Early Erfurt Dwarf25	1.25	4.50	16.00
<i>About a week later than Snowball. Leaves a little taller and the heads more flat.</i>				
192 Dry Weather or Danish Giant25	1.25	4.50	16.00
<i>Taller and later than Erfurt, has more leaves and rounder heads. Extra good for late planting as the heavy foliage is a protection against hot weather.</i>				
196 Catskill Snowball25	1.25	4.50	16.00
<i>A good strain, maturing in between Snowball and Erfurt.</i>				
199 Snowdrift25	1.50	5.00	18.00
<i>New variety from Holland. Large Snow white heads.</i>				
195 Super Snowball25	1.50	5.00
<i>A uniformly headed strain of Snowball, desirable where a large quantity is required at one time.</i>				

CHICORY

205 Brusseler Witloof05	.20	.60	2.00
<i>Select Strain.</i>				
<i>Also called French Endive. Seeded in May and in the Fall the roots are dug up, planted again in a dark warm basement or like place in boxes, kept moist, and the fresh leaves or sprouts which then grow up during the Winter months are used for salads.</i>				

CELERIAC OR ROOT CELERY

Seed should be started under glass in March, and the plants set out in rich, fairly moist ground in late May. Set the plants about 1½ feet apart.

225 Prague Giant05	.25	.80
<i>Large smooth roots with clear white flesh.</i>				

CELERY

For early celery the seed can be planted in early March, under glass, and the plants set out when no more heavy frost is expected. For late celery seed can be sown outside in May and have strong plants ready by the middle of June. The best soil for celery is well cultivated and well powdered peat soil. The plants can be planted 6 to 9 inches apart in single rows about 2 feet or more apart, or can be planted in double rows 6 to 9 inches apart and 2-3 feet between each double row. Bleaching should be started at least 2 weeks before harvest, and can be done with a wide board, special paper, or the soil can be hilled up around the plants. An ounce of seed should produce from 5,000 to 10,000 plants.

	Pkt.	Oz.	¼ Lb.	Lb
210 Paris Golden Yellow Self-blanching25	.75	2.50	8.00

<i>New golden yellow, very tender and exceptional fine quality, quite late.</i>				
220 Easy Blanching05	.30	1.00
<i>Fairly large, late, green, bleaches to clear white. Good quality and good keeper.</i>				
221 White Plume05	.25	.80
<i>Early white variety.</i>				

CUCUMBER

Out doors, cucumber can be seeded in rows 3-4 feet or more apart and the seed dropped 3-4 inches apart, an inch below the surface of the ground, or the seed can be planted in hills about 4 feet apart and 8-10 seeds to each hill. A good method where the soil is not very rich, is to dig a trench and fill in some fresh manure and then at least 6 inches of soil between the manure and the seed.

230 Hunderup Forcing . Extra good Greenhouse variety, English type, grows up to 24 inches long, smooth, slim cucumber. Seedless if insects are kept away. Has a very fine flavor, heavy producer. Not recommended for out-door planting. 10 seeds, 20c—100 seeds \$1.50.				
232 No. 315 or Hjallesse . Very fine cucumber for greenhouse growing. About 12 inches long, smooth dark green, and stays green a long time, flesh thick, small seed cavity. Greenhouse grown seed. 100 seeds \$1.00—oz. \$5.00—lb. \$60.00.				
234 Deltus05	.10	.35	1.25

PARSNIP

Sow in rows about a foot apart and thin out to about 6 inches between each plant. Sow fairly thick and only deep enough to get in the moisture of the soil.

510 Hollow Crown Medium long, thick shoulder.	.05	.10	.25	.75
---	-----	-----	-----	-----

PEAS

Smooth seeded varieties can be planted very early. The wrinkled varieties are apt to rot if the weather turns wet and cold before they germinate. The short vined does not require anything to climb on, but to get the full benefit of the taller and later kinds, they should have a trellis of some kind to climb on.

TOMATO

One method to grow early Tomatoes is to plant strong, healthy plants of a good early variety, about 1½ feet apart, in rows about 3 feet apart, then, at the same time set along side each plant a fairly heavy stake. A Tonkin cane, 5 ft. long and ½ to ¾ inch thick is good. As the plant grows, the main or center stem should be tied loosely with Raffia to the stake and all side-shoots or suckers trimmed off. When 5 or 6 flower clusters are set, the top of the plant should also be taken off, but one leaf must be left over the top flower. That way there will not be so many Tomatoes on the plants, as when letting it grow its own way, but the tomatoes will mature much earlier and the fruit will be perfect. If more than 5 or 6 clusters are wanted from a plant, the two bottom side branches can be left growing and tied on the stake, and stopped when 3 clusters are set. Varieties are listed as to their earliness, the earliest first.

Snapdragons seem to be among the most popular flowers, but the last few years a rust or fungus has been attacking them, and where that has happened the growers have quit growing them. California has now developed many varieties which are practically immune to that disease, and where rust has been formed in Snapdragon, we suggest planting only the kinds marked "Rust Resistant" in our list. These varieties are resistant to rust.

CALENDULA CAMPFIRE

Calendula is one of easiest grown annuals and can be sown where wanted, but transplants very easily. Many varieties are to be had and they are all good. Campfire is about the deepest orange and Lemon Queen the lightest yellow. The rest of the varieties are also more or less orange or yellow in different shapes of flowers.

Centaurea Cyanus (Cornflower or Bachelors Button) are easily grown and can be had in several good colors, although the blue is the most popular. Lately a dwarf compact type, Jubilee Gem blue, has been introduced from England, and this year a lavender or lilac color is added to that. The Gem type is quite distinct from the old original type in being dwarf compact, with flower stems branching up from the base of the plant.

Cosmos Sensation was introduced a few years ago by Mr. Edlund of White Bear, Minnesota, and is getting more and more popular. This type is much larger than the old type Cosmos and just as early as the Early Mammoth. It was introduced as a mixture only, mostly pink, but now all three colors can be had separately.

Should give good satisfaction the following Summer. Cardinale, Nudicaule and Sulphureum are very doubtful for wintering over in this vicinity, but farther south they should be hardy. The culture of Petunias are very easy for the small-flowered or cheaper varieties, as these can be sown both inside and outside with a fair expectation of good results. For the large-flowered or better varieties it is more difficult to get them started. For May blooming, they should be sown in a fairly warm place in January or February, and the seeds just sprinkled on the surface of very fine sifted soil and kept moist. As soon as large enough to move, they can be transplanted and later put in pots. The seeds that produce the double flowered plants, usually are weaker than the single flowered and in transplanting the double varieties, particular care should be taken.

Salvia Splendens are some of the brightest red flowers we have for the garden. The early dwarf varieties will start blooming in June if started early and the later taller kinds we usually see full of red flowers, even after the leaves have fallen off from freezing. White, pink and purple can also be had but those are not so common and not so bright.

SUGGESTIONS FOR MAKING A LAWN

In making a new lawn, the soil should be spaded very thoroughly and if any Quack-grass is present, all the roots should be picked out. The surface must be made level at the same time. After leveling, the soil should be either tramped down or rolled with a heavy roller to get the foundation firm. Seed should be broad-cast very evenly at the rate of 1 lb. of good clean seed to about 200 square feet. The seed should then be either covered with a thin layer of soil or chopped down and the soil rolled again and watered. For repairing an old lawn we recommend to scratch the sod thoroughly and deep with a rake so the dead grass can be cleared off and the surface of the soil rough, then sprinkle the seed. Now go over the lawn again with the back or smooth side of the rake to cover up as much seed as possible. Another method will be to sprinkle seed on the old lawn and then cover with at least 1/2-inch of finely pulverized peat moss. Once in a while the lawn, especially an old one, should be given an application of some good plant food containing Nitrogen.

SPIKE TAMP

A very handy tool to use when seeding grass seed or putting fertilizer on lawns. The spikes aerate the soil and help drainage. The tamper side used for pressing the seeded areas. Can also be used for softening and pulverizing soil. Price **\$4.50.**

GARDEX "Soil-Flow" GARDEN TOOLS

GARDEX Pull Hoe

With an easy pull, the sharp V-Shaped Blade bites into the ground.

As you walk along, the soil flows over and through the side guards which also protect plants when doing quick, close work. Thus it weeds and cultivates in one operation, leaving soil finely mulched just where you

want it, without exposing moist soil to sun. No weeds can escape and it gets most of them out by the roots. Handle fits socket perfectly—a firm tamp and it's in to stay—no bolts, screws or wedges to bother with. Made of Special High Carbon Steel for lasting service. Polished Blade.
 No. 1004. 4 in. wide, 4½ ft. handle.....Price \$1.10
 No. 1005½. 5½ in. wide, 5 ft. handle.....Price 1.25

GARDEX TURF EDGER

Now you can edge your lawns, flower beds or borders as fast as walking and do a neater job. This New Edger cuts turf vertically and horizontally in one operation working forward or backward. By tilting to 45° angle, it cuts clean V-shape groove between sidewalk and lawn. Wing blade also used to lift sod out as it cuts. Made of special High Carbon Steel—polished blade and sharpened on all sides except top.

No. 400—4½ ft. handle. **\$1.30**

DANISH SEED COMPANY

14 Glenwood Avenue

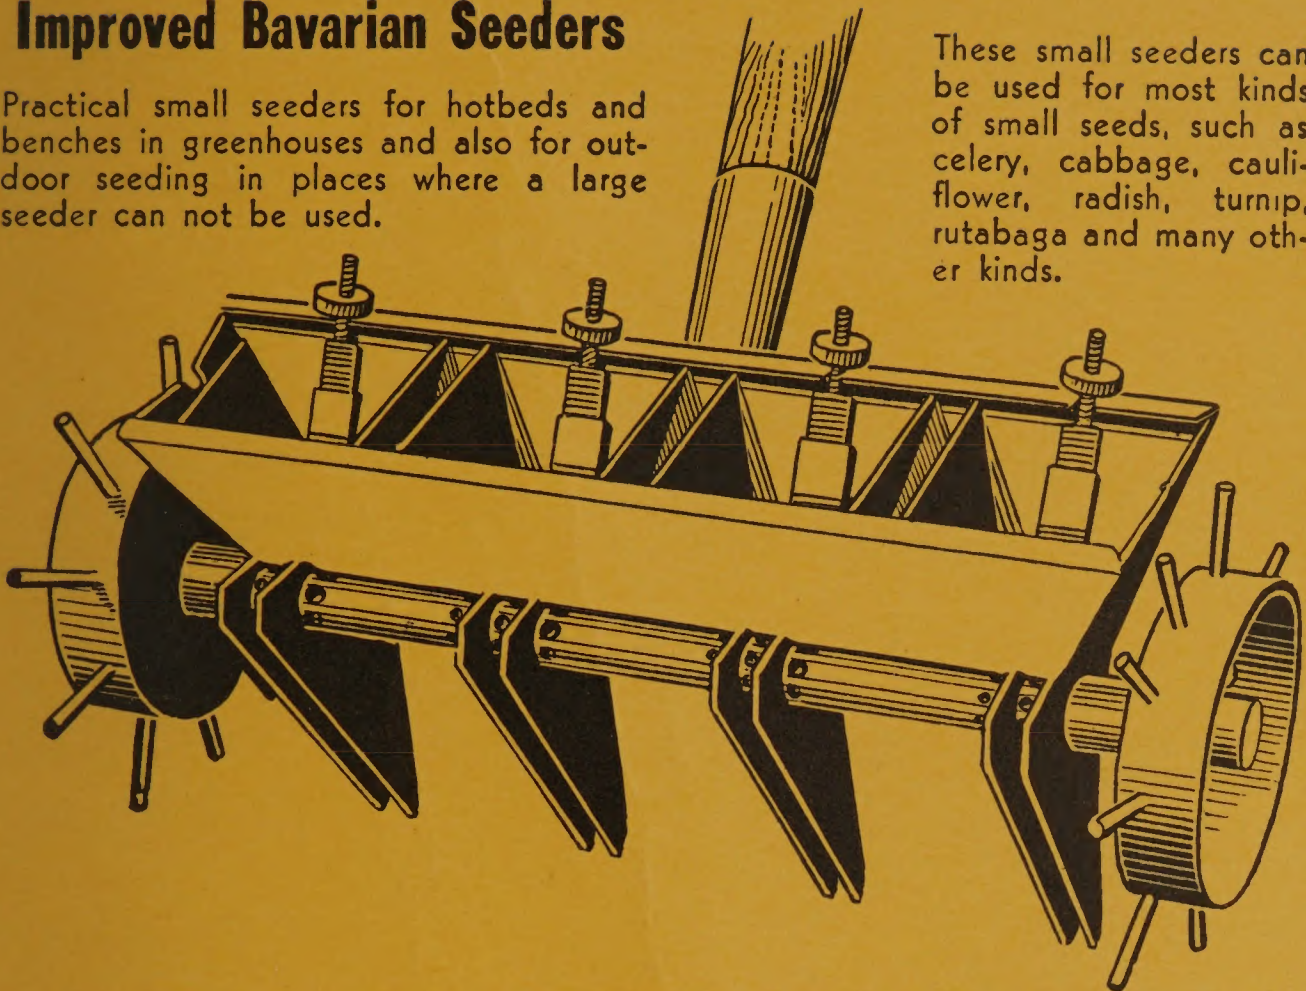

Minneapolis, Minnesota

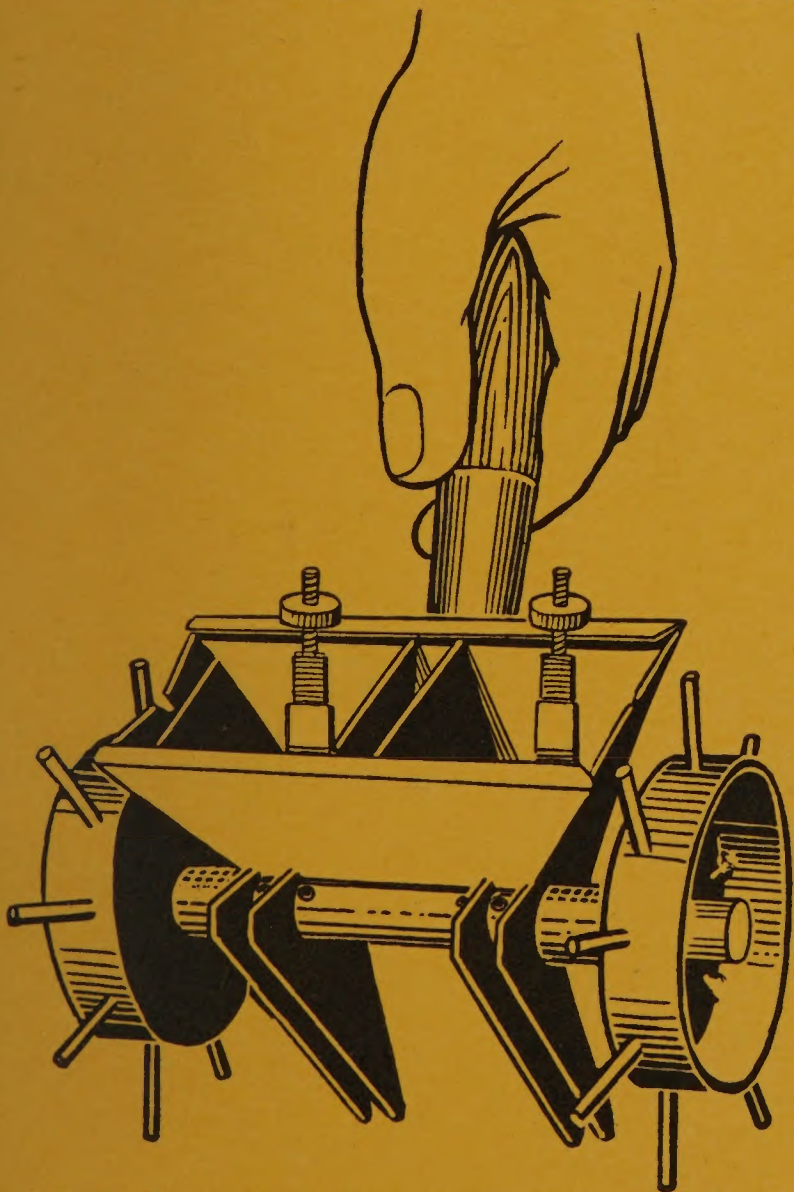

Improved Bavarian Seeders

Practical small seeders for hotbeds and benches in greenhouses and also for outdoor seeding in places where a large seeder can not be used.

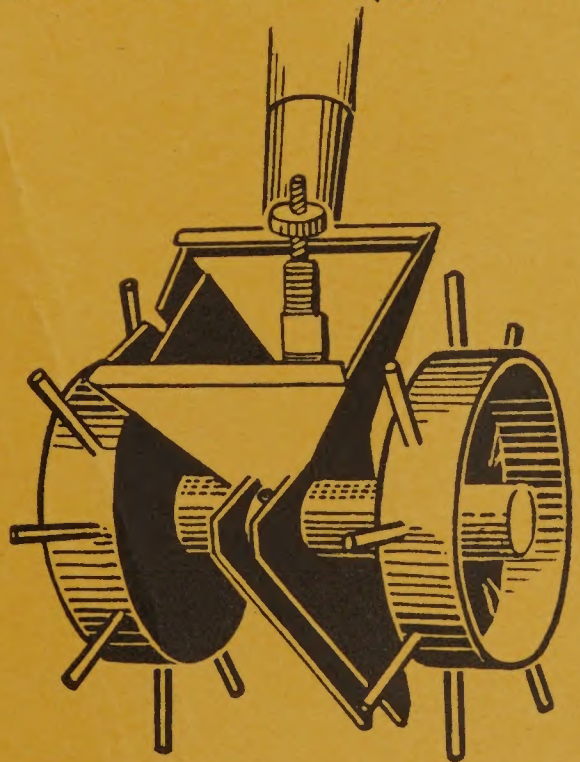

These small seeders can be used for most kinds of small seeds, such as celery, cabbage, cauliflower, radish, turnip, rutabaga and many other kinds.

4-Row Seeder. This machine is about 10½ inches long and seeds 4 rows 2¼ inches apart. Price.....\$6.50

2-Row Seeder is about 6 inches long and seeds 2 rows 2¼ inches apart. Price.....\$4.50

1-Row Seeder is 4 inches wide. Price.....\$3.25

Users who have tried these machines and have any use for them find them almost indispensable. For seeding radishes in benches or hotbeds it takes only a small part of the time it otherwise takes to seed by hand.

We do not furnish the handles for any of the machines. The prices offered are F. O. B. Minneapolis.
